

6/30/17

Sunday, July 9, 2017 9:57 PM

Miniprepmed overnight cultures of the LC1539 and LC1853 plasmids. This was done to sequence the samples.

6 mL, as a range of 5-8mL worth of overnight culture of DNA is recommended by the Qiagen Miniprep Kit, of each overnight culture type was spun down for the miniprep.
