Wednesday, October 4, 2017 8:20 AM

In lab: Salma (8-11)

Miniprep LC 1853 and LC 1539 cultures

- Started off with pipetting each 50 mL culture into 5 10 mL cultures
- Combined samples after lysing--> combined supernatant when transferring to spin column

Sample	Concentration	Ratio
LC1853	122.05	1.85
LC1539	98.05	1.87
