

8/14/17

Monday, August 14, 2017 10:35 AM

Who's in lab: Ayesha, Salma (9-)

Cell Competency Test

- Performing a cell competency test to see if competent cells made on Friday are efficient
- Transformed 1uL of 50pg/uL and 10pg/uL into BL21 and Dh5a
- Transformants were plated on AMP plates and left to incubate in the 37oC room

Submit JOE+YCP for Sequencing

- Submitted at 2:45 into the Sequencing dropbox (Salma)

Tomorrow:

- Count colonies grown on test plates and calculate efficiency
- Depending on outcome of competency test, transform Gibson Assembly 2 products into BL21
